

Transportation Asset Management Council
Monthly Report

January 2006

- Staff has received all PASER condition data collected in 2005 and is beginning the process of evaluating the information.
- The process to begin registering road agencies for the Asset Inventory Reporting tool has begun. Some 133 agencies have registered as of January 30th.
- Cambridge Systematics put on a test run of the Michigan-based asset management class. Twenty-seven individuals took part in the test that was held January 18th. Based on the feedback received at the test Cambridge Systematics and staff will be revising the content. The Council will get a clean copy at their March 1, 2006 meeting.
- Work continued on the planning for the first annual Michigan Asset Management Conference to be held May 10, 2006, at the Kellogg Center on the campus of Michigan State University. Speakers have been identified and letters of invitation are being sent out to them.
- The Model Analysis Team held its first meeting on January 17th in Lansing. The team identified team responsibilities and protocols for meeting. Members met with the Strategic Analysis Committee on January 25th. The next meeting of the MAT will be February 9th in Lansing.
- The Council's contract with Michigan Tech for the development of the strategic analysis tool was approved at the January meeting of the State Administrative Board.
